ENHANCING LIVES THROUGH DESIGN

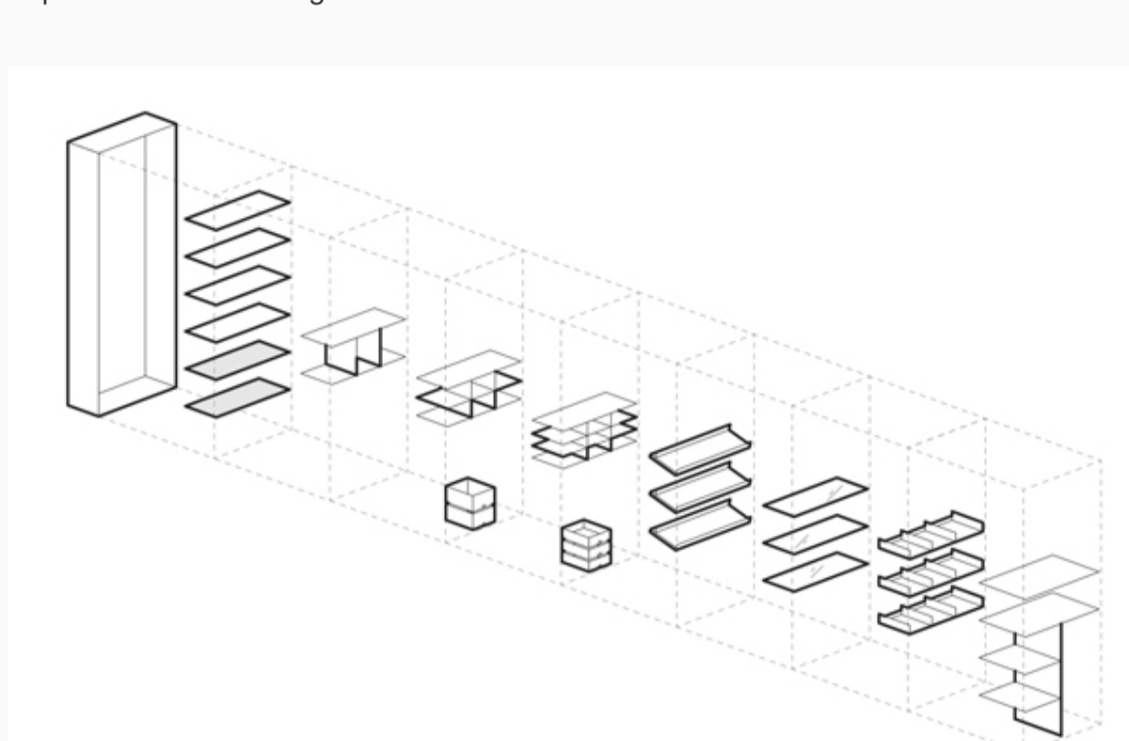

Product Spotlight: CABINA

A versatile walk-in closet system with a minimalist design and great capacity for personalization.

In **Cabina**, visible uprights in titanium replace the side panels normally dividing the closet modules. This simple detail contributes a lighter aesthetic, making the clothes the real protagonist.

The open modules can be arranged in linear and corner layouts that give you the freedom to play with widths, heights, and depths. Complementary modules feature solid or framed glass doors with different degrees of transparency, providing options to personalize the design even further.

THE INTERIOR

Design elements include drawers with leather inserts, extractable trays covered in elegant fabric, open shelf grids in two heights, single/double shoe racks with titanium profile, and trouser racks finished in easy leather to keep items from falling. The upper drawers can feature a glass top.

Dimmable motion-sensor or remote-controlled LED lights placed on the back of the uprights illuminate every inch of the closet and provide soft ambiance.

THE ISLAND

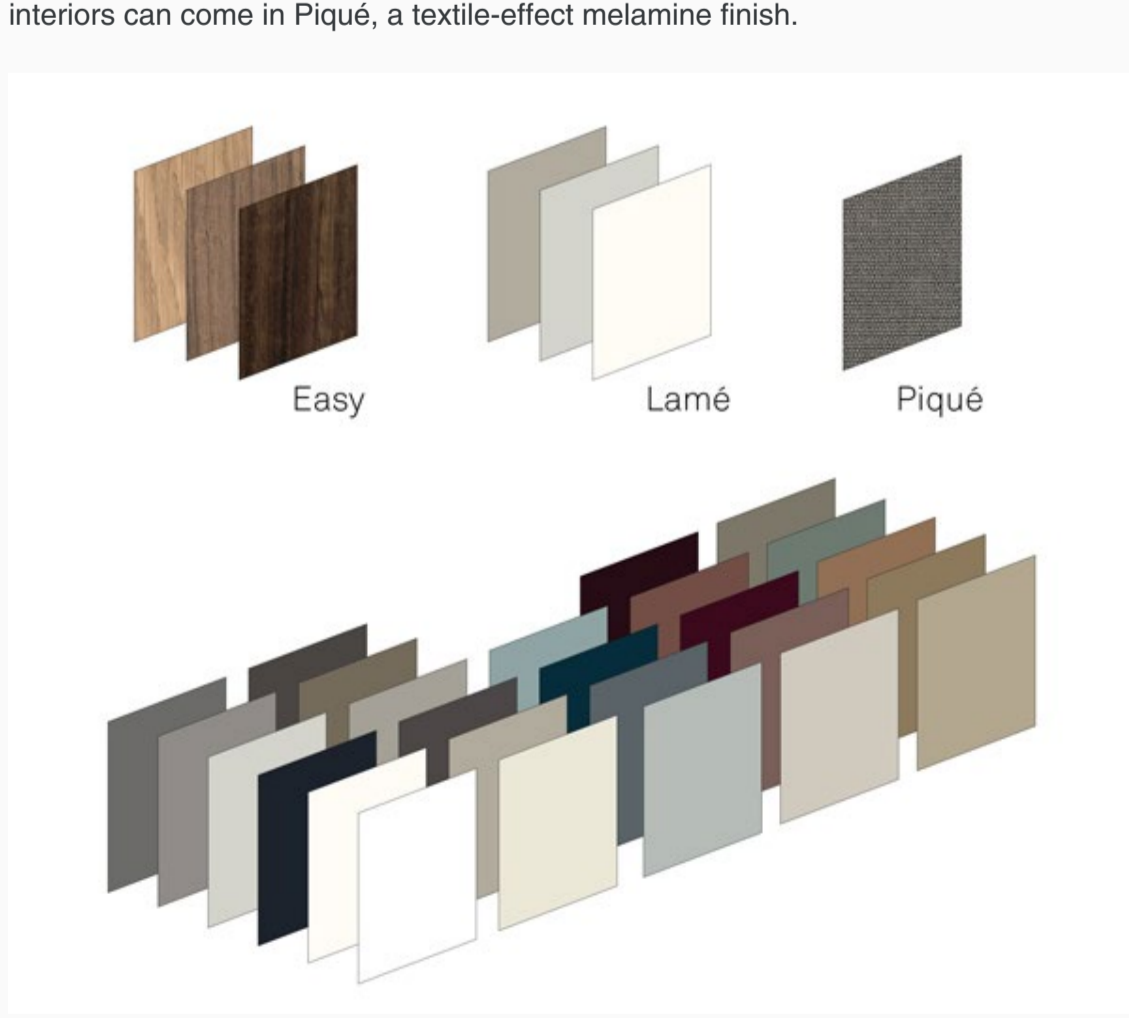

Perfect to keep fashion accessories organized, the island is an add-on designed to sit in the middle of the walk-in closet. It can include a side bench, turning the space into a functional dressing room. Each side of the unit is fully customizable to optimize its use.

FINISHES

With a selection of over 30 finishes in neutral tones, your Cabina closet will never go out of style.

The range includes soft-color melamines (Lamé), Easy finishes replicating the feel of eucalyptus, walnut, and oak woods, and water-based matte lacquers (with tailor-made colors from the Pantone RAL chart also available). Back panels and drawer interiors can come in Piqué, a textile-effect melamine finish.
