MandiCasa™

by Dario Snaidero

ENHANCING LIVES THROUGH DESIGN

Product Spotlight

Behind its streamlined design, MandiCasa's [most high-end kitchen cabinetry line](#) reveals great capacity for inside-outside personalization.

The handle-less cabinet door is 0.86" thick with a modern 33° profile and a flat or round groove.

Our continuous investment in product development and technological innovation makes it possible to bring an unprecedented range of textured and smooth finishes (130) to cabinet doors with this type of profile.

The range includes finishes that use specialized manufacturing processes and handmade details to obtain interesting aesthetics, tactile qualities, and resistant surfaces.

Examples are the thermo-treated oak and a series of unique lacquers (some of which are an industry exclusive) which re-create the look of natural stones, brushed and reflective metals.

Grigio Fumo high gloss lacquer with door grooves in the same finish. *Solaris* system using a micro-laser engraved Plexiglass back panel to light up the open units.

Tall units in thermo-treated oak, island in *Rame* metallic lacquer, *Infinity boiserie* in *Beton* melamine with metal shelves.

Giallo Zolfo high gloss lacquer with tall units in *Ghisa Urban* lacquer, created with metal powder and a handmade "cloudy" effect. On the wall, *Size* open storage units in anodized aluminum.

A variety of [customizable drawer accessories and storage elements](#) for pantry units, base cabinets, wall, and countertop complete the design, combining an effortless organization of the space with elegant lines.

Left: *Wing* system with pocket doors, custom wall accessories, drawers, and a pull-out stainless-steel top.

Right: *Modus* under-cabinet storage system with optional open and closed elements.

Drawer organizers can come in oak, walnut, wenge, beech, or white wood and black metal or stainless steel.

All kitchen cabinets hold the "100% Made in Italy" certification, a prestigious mark that recognizes the products are designed and manufactured entirely in Italy. Panels, carcasses, and sliding mechanisms for base cabinets and columns are CARB2 certified.
