

ENHANCING LIVES THROUGH DESIGN

# Transform Your Closet Space with MandiCasa's New Modules and Finishes

The goal of all **MandiCasa closets** is to reinvent and amplify space while offering a stunning aesthetic addition to luxury home interiors. Our new modules and finishes take this goal to the next level.

## KERA FINISHES

The new Kera ceramic finishes bring their striking beauty to the closets in the MandiCasa Collection. Six different options reproduce the look and feel of marble and stone, delighting you with their presence every time you open your closet. The finishes are highly resistant to shocks, stains, and scratches, guaranteeing product longevity.

When paired with wood, the Kera finishes give the closets a natural, sophisticated definition. Used with glass doors, they become a tantalizing part of the design, appearing and disappearing to a greater or lesser degree depending on the transparency of the glass.

## CANNETÉ FINISHES

The new Canneté finishes give the doors an interesting visual rhythm, enhancing the vertical grain of the wood and creating a play of light and shadow. They also add a tactile component to the design.

The Canneté finish is available on Oak, Eucalyptus, Walnut, and Natural wood. Combine it with modules with doors in framed glass (smoked, mirror, or extra clear) or a variety of lacquers for different aesthetic results.

## EUCALYPTUS WOOD

With its visual depth, dynamic pattern, and rich hues, our Eucalyptus finish turns closets into show-stoppers, bringing the full allure of wood into your everyday rituals. The minimalism of our closet systems allows this material to take center stage and put its dramatic imprint into the luxury home space.

## SPACE-ENHANCING MODULES

The result of a patented mechanism of levers, magnetic pistons, and hinges, our total-opening bi-folding closet doors fold in on themselves taking up very minimal space. A simple, effortless gesture activates the silent and smooth movement, leading to the reveal of the customized interior of the closet.

The depth-change module, barely noticeable from a frontal view, offers additional open storage on both sides and is perfectly suited for the small items you want to keep close at hand.

The external corner module also re-conceptualizes the sides of the closet. It transforms them into a customizable containing the opening ideal of the door and carefully positioned to be aesthetically impactful but never obtrusive.

The double-sided closet is an ideal solution to visually and functionally delineate different areas within an open-layout space. The Dual doors give the closet exterior a continuous aesthetic rhythm, disappearing completely between the vertical slats when closed. They then fold in on themselves to open the unit like a treasure chest. Customize the closet in dimensions, finishes, and accessories depending on its desired use.
