

ENHANCING LIVES THROUGH DESIGN

UNICA Bespoke: A Pinnacle of Personalized Luxury Kitchens and Home Interiors

MandiCasa's [UNICA Bespoke](#) brings you the luxury of fully custom-designed kitchens and home interiors, 100% made in Italy and personalized to match your aesthetic and functional specifications in every single detail, down to the last fraction of an inch.

Unlike a mere collection of cabinet models, UNICA is a vast, integrated ecosystem of top-tier contemporary solutions that continues to evolve with each new project and client request.

Lacquered Cast Iron on flat and ribbed doors. Greek Black ceramic was used to clad the wall and the hood. The width of the recessed handles was customized to each door to create the desired effect.

UNICA takes the exclusivity of luxury to the next level. It gives us the ability to craft spaces that are truly unlike any other ever made and meet affluent homeowners' ever-growing desire for interiors that transcend the ordinary; interiors that are deeply personal because they are designed exactly as they want them to be, without creative limitations.

In this project, the tall units were made to disappear behind a continuous boiserie of slatted light oak. On the left, the boiserie also conceals the entrance to the pantry, located behind the kitchen and visible through the ribbed glass panels that frame the sink unit.

By combining the efficient capabilities of industrial innovation with the know-how and problem-solving skills of experienced Italian craftsmen, we are able to bring to life our clients' visions for distinctive elements and one-of-a-kind features.

This includes: non-standard dimensions; tailor-made storage systems; pantry units that blend with the architecture of the room; creative solutions that integrate existing structural details; finishes that match the materials used throughout the home; and so much more.

UNICA Bespoke's unlimited breadth of possibilities means the client's imagination becomes the only thing defining what the end result will be.

To accommodate the non-standard dimensions of the space, this unit was designed with a single pocket door to the left and a bi-folding pocket door to the right to fit the slightly larger width, creating two distinct functional areas.

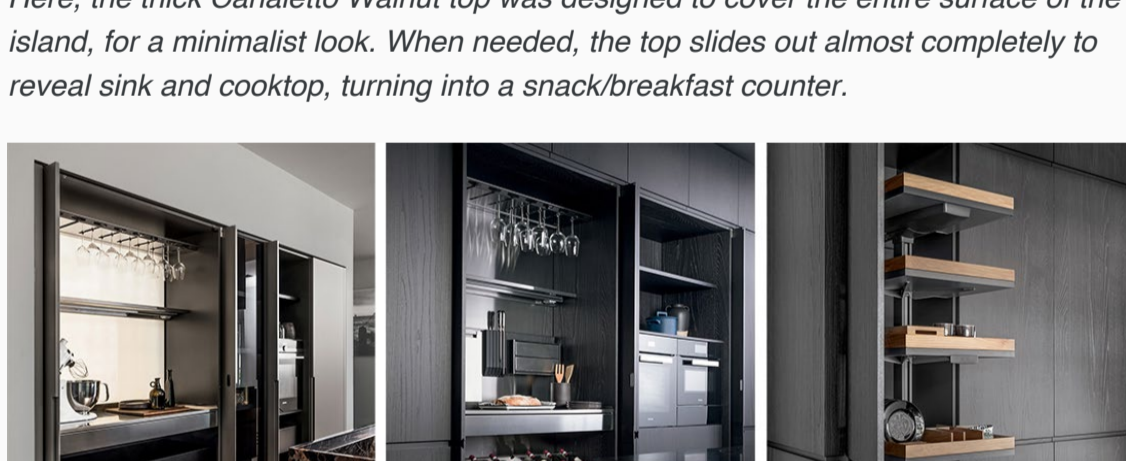

On the right, the window opening uses custom-sized elements to match the aesthetics of the surrounding cabinets.

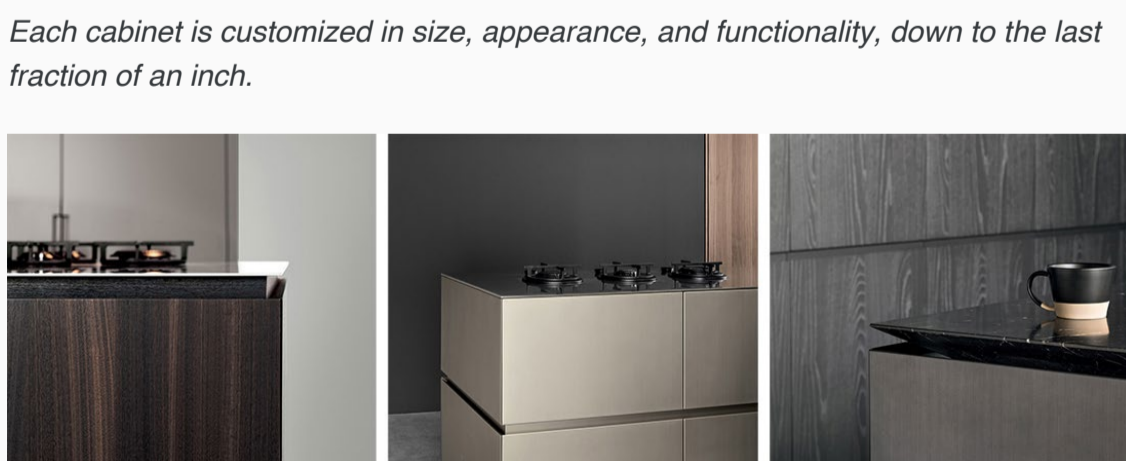

In this unique island design, the typical full cabinetry solution was replaced by a suspended set of drawers. On the wall, a boiserie in ribbed Canaletto Walnut conceals storage, appliances, and a pivot door to access the hidden pantry room.

Here, the thick Canaletto Walnut top was designed to cover the entire surface of the island, for a minimalist look. When needed, the top slides out almost completely to reveal sink and cooktop, turning into a snack/breakfast counter.

Each cabinet is customized in size, appearance, and functionality, down to the last fraction of an inch.

Every detail is tailor-made to the client's specifications.

Left: 4mm-thick countertop in vintage finished stainless steel paired with cabinets in Smoked Eucalyptus. The channel was designed to match the cabinets, forgoing the use of a third material.

Center: Counter and cabinet doors were custom cut at a 45° angle to make the edge of the cabinets appear flush with the top, enhancing the minimalism of the design.

Right: The Black Marquinia marble counter was custom cut at a 30° angle - as are the profiles of the cabinet doors, completely hiding the recessed channel from view.
