

## New Solutions To Personalize Your MandiCasa Closets

MandiCasa's [Made-in-Italy closets collection](#) continues to expand, with new solutions introduced to personalize the closet space even more - in aesthetic and functionality.

### NEW DUAL DOOR

The new Dual door consists of two panels of the same width joined in the middle through a recessed aluminum profile. This creates a consistent rhythm that defines the aesthetic pace of the closet.

The Dual model can be applied to [swing](#) and [total-opening bi-folding doors](#). Wood, wood melamine, ceramic melamine, and lacquer finishes are available on these doors, with different finishes applicable to the two panels within the same door to open up new ways of personalizing the closet design.

### EXPANDED OPTIONS FOR CORNER CLOSETS

The structural constraints of corners turn into opportunities thanks to the compositional flexibility of our closets, with almost infinite solutions to envelop the walls of the home.

The width and depth of the two sides are mutually independent and fully customizable, to match the architecture of the space. A combination of swing doors and total-opening bi-folding doors in different widths makes every inch easily available. The side panel can be covered with a mirror, lacquered glass, or a Kera ceramic finish, to increase the visual impact and versatility of the design.

The [outer corner closets](#) rewrite the junction points of the room, transforming them into storage elements.

Each side of the outer corner closet can have its own character and functionality, each defining the personality of the space it faces in a different way. The glass doors feature a new Flat profile on the aluminum frame, and can open through a 95° or a 155° hinge (standard on outer corners, upon request on non-corner modules).

### DUAL DOORS AND KERA FINISHES FOR WALK-IN CLOSETS

With Cabina, the [walk-in closet](#) becomes livable space, in a rhythm of alternating materials and functions, open and closed elements. The integration of the new, double-paneled Dual doors can create very dynamic compositions when paired with glass doors and wider modules. To complete the design with exquisite elegance, the new Kera ceramic finishes can be used for the interiors of the closet as well as on the accessories island sitting in the middle of the room.

### CLOSET LIGHTING: A REFINED TOUCH

Inside the closet, motion-activated sensor lights embedded along the back of the uprights spread to full height within the module. The strategic placement of the lights showcases both the contents of the closet and the beauty of the back panels, be they in a wood or Kera ceramic finish.

### BRIDGE MODULES

In the new [bridge modules](#), the structure adapts to the space and its function. The closet becomes a frame that can accommodate desks, beds or sofas, while maximizing storage. An array of door widths and heights, open elements, finishes, and accessories increase the aesthetic fluidity and compositional efficiency of the entire design.
